

# ON THE RECORD

## *Drivers Terms And Conditions 2015*

Drivers please note, the new DRI Terms & Conditions dated Jan 2015 is now available. This can be viewed and downloaded in PDF on the company workmate website: <https://workmate.southeasternrailway.co.uk> Please log on using your company username and password.

## *Medication*

DCC would like to remind all drivers on medication, that you must inform the recourse center BEFORE you take any prescribed or over the counter medicine. In a recent case we have dealt with saw the driver manager not wanting to pay the driver for the time off but also considered discipline.

DCC found that it was unintentional from the driver, so we were able to sort out the situation but we may not be so successful in the future.

## *West Wickham*

An enquiry has begun investigating the incident at West Wickham. ASLEF has worked closely with the enquiry and is represented by Steve Gurdler (H&S Rep Faversham). A report will become available once the enquiry is concluded.

## *D.O.O (P) Project/Monitor Reporting*

As you may be aware, following some concerns about the status of some DOO Monitors, the company has set up a DOO Monitor Working Party, which has been reviewing various aspects of monitors and their maintenance.

The workshop is comprised of P Calvert Route Knowledge Manager, Ali Hussein DCC representative, Mark Parrin H&S representative and Steve Gurdler H&S representative. We have surveyed all DOO Monitors on the Southeastern Network, but now need your help to enable us to work closely with our colleagues in Network Rail to ensure that reported monitor faults are being rectified in a timely manner.

Therefore, please continue to report all faults initially to the signaller in the normal manner and then send an email to [doo.monitors@southeasternrailway.co.uk](mailto:doo.monitors@southeasternrailway.co.uk) including the following information:

**Date, Time, Train ID, Traction type, Station, Platform, Stop Mark, Monitor number, Fault type.**

With your help, we hope to improve the quality of the monitors.

Ali Hussein
